

Pocket-sized protection from Proporta for Pocketsurfer 2

Posted by [gasusan2005](#) on 02/19/08 in [Cases](#), [Proporta](#)

The Pocketsurfer 2 is an ultra-thin portable device that fits easily into your pocket or bag and delivers the real web, just like at home or at work. Weighing in at only 174 grams, the Pocketsurfer 2 allows you to browse the web in its original layout on a 640x240 full colour widescreen display and boasts a mouse cursor and a full backlit QWERTY keyboard, making it the most usable hand-held web device around.

[Proporta](#) offer two types of case for this device; both continue the same level of style, protection and elegance that you'd expect from Proporta - it all comes down to your personal choice.

If you prefer a real leather case, you'll struggle to find a smarter and more protective one than this... as with many cases, Proporta's [Alu-Leather Case \(Datawind Pocketsurfer 2\)](#) is custom made. However, what sets it above the rest is that it also features a layer of rigid, yet lightweight aircraft grade aluminium which lines the leather and subtly protects your screen against crushing and impact shocks.

On the other hand, you may prefer their alternative to real leather – the [Classic Case \(Datawind Pocketsurfer 2\)](#). Again custom made to fit the exact specifications of your device, this case is easy on the wallet and provides the same stylish protection as that of a leather case.
